Next-Gen Unified Communications

A carrier-grade platform designed for service providers to deliver innovative, white-labeled cloud PBX and unified business collaboration solutions. Our horizontally scalable and highly available architecture ensures a seamless experience across desktop, mobile, and IP phones.

Smarter, Interactive Communications

Move beyond isolated tools.

MobileUC integrates communications, collaborations, and video into a single platform, allowing you to run your business from any device, anywhere in the world.

Unified Experience

Enjoy consistent features across desktop, web, mobile apps, and traditional IP phones.

Next-Gen Collaboration

Take productivity further with group chat, file sharing, screen sharing, and multi-party video conferencing.

Simple Onboarding

New users receive a personalized email and can join with a one-click login process.

Carrier-Grade Reliability

Reliability & Scale

Our geo-redundant, multi-tenant cluster ensures maximum uptime, surviving full data-center failures without service loss. Effortlessly scale from one to over 500,000 users on a single, robust platform.

Proactive Security

Security is built-in by default, featuring firewall protection, geo-blacklisting, fraud prevention with per-day limits, and rate-limited API calls to keep your communications secure.

Seamless Integration & Whitelabeling

Integration & Brand

Control MobileUC is a turn-key, fully whitelabelled solution, allowing carriers to deliver a high-end communication platform under their own brand.

Ecosystem & Efficiency

Leverage robust APIs for deep integration with Office 365, CRM platforms, and AD/LDAP. Simplify operations with bulk CSV uploads for rapid user onboarding and handset provisioning.

Comprehensive Feature Set

Our platform offers a rich suite of tools designed for modern business needs:

Cloud PBX

Hosted PBX services including Auto-Receptionist, multi-level IVR, call reports, and audit trails.

Advanced Mobility

Dedicated iOS and Android apps with HD codecs for high-quality voice and video over Wifi, 3G, or LTE.

Productivity Tools

Visual voicemail, fax-to-email, find-me/follow-me, and "Slack-like" team collaboration.

Business Intelligence

Detailed usage reports and a real-time NOC (Network Operations Center) dashboard for monitoring and alerting.

How We Compare

Features

Max User Capacity
White-Labeling
Redundancy
Multi Tenancy
Architecture

MobileUC

500,000+
Fully Brandable
Geo-Redundant Cluster
High-Density Native
Active-Active Cluster

Industry Standard

Typically 100 – 10,000
Often limited or restricted
Often single-site or add-on cost
Tenant limits often apply
Mostly Active-Passive or Single

Why Choose BVS?

Your phone system is only as good as the people supporting it.

Voice has been part of the BVS story since the beginning.

We've seen business communications evolve from traditional onsite PBXs to IP telephony, hosted voice and today's Unified Communications platforms.

But one thing hasn't changed: when someone can't make or receive a call, they want it fixed.

That's why we don't simply provide the platform. We help design, migrate and support your communications environment so it works for the way your business operates.
