We Don't Just Connect Your Business. We Help Protect It.

Cloudflare security comes standard with BVS connectivity

In today's fast-paced digital landscape, protecting your organization shouldn't mean slowing it down.

BVS Secure Business, powered by Cloudflare, delivers a modern, cloud-based security platform designed to eliminate the complexity of traditional VPNs while robustly safeguarding your infrastructure.

By combining cutting-edge Zero Trust Network Access (ZTNA) with enterprise-grade Web Application Firewalls (WAF) and lightning-fast DNS security, we ensure your hybrid workforce stays seamlessly connected and your critical data remains ironclad against evolving cyber threats.

Partner with BVS Telecom today to simplify your IT, optimize your network performance, and secure your business from anywhere in the world.

branch offices

Teams needing secure
remote access

What BVS Secure Business Delivers

A streamlined security stack for access, websites, DNS and user connectivity.

Access Without Exposure

Secure users and devices from anywhere

Secure Remote Access

Identity-based access to business apps without exposing your network.

- Secure access from any location
- Multi-factor authentication
- Identity-based access control
- No public RDP or exposed ports

VPN Replacement

Replace traditional VPNs with modern, cloud-managed secure access.

- No complex VPN hardware
- Faster remote connectivity
- Reduced IT complexity

Works with Microsoft 365 and Google Workspace.

Connectivity and DNS

Encrypted access plus safer browsing

Cloudflare Tunnel/Mesh

Encrypted connectivity for users, devices and internal services.

- Private access to internal systems
- Device-aware security policies
- Improved browsing performance
- Always-on protection for workers

DNS Security and Performance

Faster, safer browsing with protection against malicious domains.

- Secure DNS filtering
- Malware and phishing protection
- Encrypted DNS with DoH/DoT

Protect users whether they are in the office, at home or on the road.

Web App Protection

Encrypted access plus safer browsing

Secure Remote Access

Cloudflare-powered WAF protection for websites and business apps.

- DDoS mitigation
- Bot protection
- SQL injection prevention
- Web attack filtering

Policies and Reporting

Keep security controls visible, consistent and scalable.

- Managed support and monitoring
- Security policy creation
- Onboarding and reporting

Secure portals, web apps and customer-facing sites globally.
